Dock Plus Shelters

Our dock plus range offers two types of shelters - retractable dock shelters and inflated dock shelters - both providing safety and weather protection to personnel loading and unloading vehicles.

Product Overview

Product description

Dock Plus Retractable Shelter:

Heavy duty retractable shelter that will retract for protection when hit by a loading vehicle.

Manufactured from strong electro-plated ERW tube, this retractable system is the safest of all dock shelters.

Dock Plus Inflated Dock Shelter:

A single or three phase motor inflates the shelter to form a tight seal around the vehicle, maintaining temperature control.

This energy retention makes the inflatable dock seal ideal for air conditioned or cold storage facilities.

Common Uses

Loading Bay, Distribution Centers, Industrial Units, Hospitals, Retail Units.

Maximum Sizes:

Wide range of widths and heights available.

Construction

Dock Plus Shelters

Facia curtain is a manufactured from a Cordura type material, which is a strong, woven nylon reinforced fabric. Main frame is manufactured from electro-plated ERW retractable tube with 2 cantilever arms.

Operation

Dock Plus Retractable Shelter – Manual operation

Dock Plus Inflated Dock Shelter – Electric operation

Safety

Rubber buffers are positioned to limit vehicle impact damage.

Curtain side edges are marked for safety.

Finish

Galvanised steel as standard, polyester powder coat available on request.

Accessories

Graphics of your company logo can be positioned on the curtain at high level.

Product specification may change and it is advisable to consult with HAG technical advisors before specifying or ordering. HAG operates a policy of continuous improvement.
